To Whom It May Concern:

This is to inform you that Lanca Contracting has done a few projects for us. The first project was Cenpro Pharmacy 25 years ago which was a partial expansion of Central Professional Building on Brant Ave. He did an excellent job and finished the project on time.

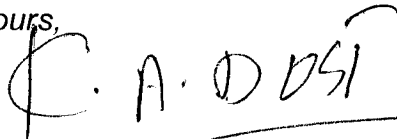

The second project he did for me was in 2003 regarding the expansion of my plaza at 627 Park Road. There he built the Park Road vet clinic and finished on time.

The next project was in 2004 at 160-162 Colborne Street which is University Pharmacy and D&R Residence. To my surprise 80% of the project was done in just 12 weeks. The foundation was laid July 13th and students were in residence September 1st. A remarkable and excellent job was done. The project was finished on time and within budget. He and his staff are always very professional. As a matter of fact a lot of positive comments were made from the Mayor and City Councillor.

In the winter of 2005 he built at 625 Park Road a 15,000 square foot plaza. Again the project was finished on time. He also did interior decorating for the Canadian Food Inspection Agency (Federal Government). Everything was done within the budget and deadline.

At the present time, this summer of 2006 he is building us around a 40,000 square foot industrial building. We are very pleased with his workmanship, honesty, and integrity and I highly recommend Keith Lancaster and Lanca Contracting Inc.

Sincerely yours,

President
