To Whom It May Concern:

**Re: Lanca Contracting Limited**

---

Lanca Contracting Limited recently completed our 1.2 million dollar addition and renovation to our plate line building located on Old Onondaga Road in Brantford.

Every member of the Lanca group has been very professional, personal and has fully engaged themselves in our project from our very first meeting. Their presentations were very clear throughout bidding phase, contract award and the building construction process.

Our project was an intricate project with many facets to contend with and in particular this project was an addition to three buildings while at the same time, continuing our normal operations. We were most impressed at how the Lanca team took care of any challenges that arose and were always dealt with promptly, without compromise. The staff and trades worked very well with our staff in coordinating the construction schedule to accommodate our needs.

Lanca Contracting Limited has been in the business of meeting and exceeding the customer's expectations for many years. We have been very impressed with their approach, their timely response and their staff throughout. We are looking forward to our next project with Lanca Contracting Limited and we freely recommend you consider using their services.

Sincerely,

**BLASTECH CORPORATION**
